RadioScan® Spectrum Analyzer (P/N 5988)

Easily Visualize Radio Energy and Create Broadcast Plans

RadioScan Spectrum Analyzer (City Theatrical P/N 5988) is a 900MHz/2.4GHz spectrum analyzer that enables you to easily visualize radio energy that is otherwise invisible to you.

Using RadioScan helps you to create a broadcast plan that optimizes available spectrum in your area, and helps prevent interference with other mission critical radio devices near you. For users of Multiverse® wireless DMX/RDM products, RadioScan will guide you in creating the optimum broadcast plan for your production.

Key Features:

- 900MHz/2.4GHz dual band spectrum analyzer to find all radio activity nearby in chosen spectrum

- Identifies SSID and signal strength of Wi-Fi networks; shows either Spectrogram or Waterfall view

- Can record and play back scans of unlimited length; takes and saves snapshots

- Records text notes on scans; prompts Multiverse SHoW IDs
